

Kitchen Mixer: 16084A-4-CP

BEFORE YOU BEGIN

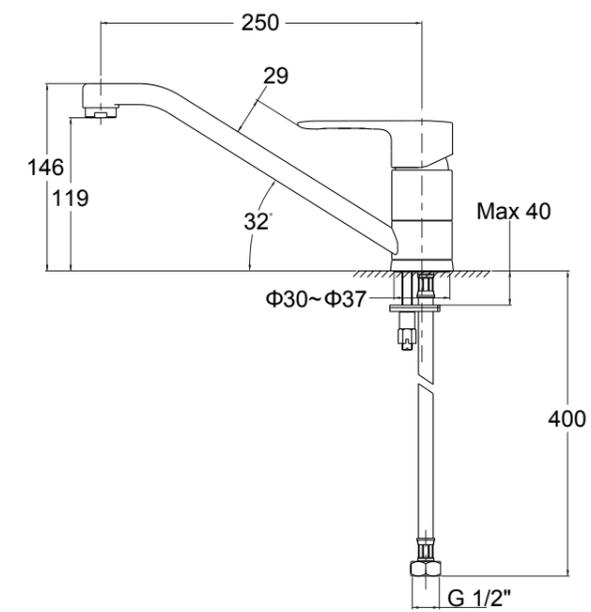

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.

Please leave these instructions for the consumer. They contain important information.

NOTES:

1. Flush the water supply pipes thoroughly to remove any debris.
2. An inline water filter must be used with this product.
3. Inspect the supply pipes for damage. Replace as necessary.
4. Observe local plumbing codes.
5. If possible, install this kitchen set before installing the sink.
6. Recommended working pressure: 100KPa to 500KPa.
7. Maximum working pressure: 800KPa.
8. All installations should comply with the relevant requirements of AS/NZS 3500 and AS/NZS 6400.

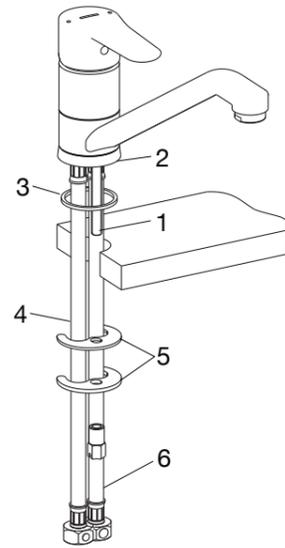

ROUGH-IN DIMENSIONS

16084A-4

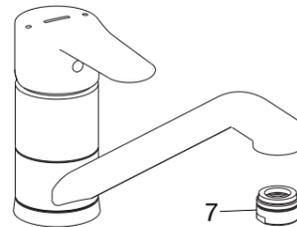

INSTALLATION

- 1.) Install mounting stud(1) into the tap body base(2). Tighten it by hand.
- 2.) Slide the washer(3) over the flexible hoses and mounting stud, and into the groove at the bottom of the tap body.
- 3.) Insert the flexible hoses(4) into the sink hole. Position the tap. From underside of the sink, place the bracket(5), (Rubber washer on the top) onto the mounting stud(1), and secure the tap with the nut(6).
- 4.) Attach the hoses to water supplies. When facing the front of tap, the left hose connects to hot water, the right hose with "COLD" label connects to cold water.

INSTALLATION CHECK

- 1.) Ensure that all coupling nuts are tight.
- 2.) Ensure that the lever handle is in the off position. Turn on the main water supply and drain, and check for leaks. Repair as needed.
- 3.) Remove the aerator(7). Run hot and cold water through the tap for about one minute to remove any debris. Check for leaks and repair as needed. Remove any debris from the aerator. Shut off the faucet. Reinstall the aerator.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with a clean soft cloth. Many cleaners may contain such chemicals as ammonia, chlorine, toilet chemicals etc. which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler fittings.
